Students are responsible for completing any required prerequisite courses.

Flexible, convenient opportunity for self-enhancement...

Certificate programs are a sequence of credit classes that provide you with core competencies in a specific area. Certificates are ideal if you want to set smaller, more immediate educational goals and work up to meeting larger ones. A certificate program can be the gateway to a college degree.

Certificate programs offer advantages if you already have a degree. You can gain knowledge in a new subject area, stay current with developments in your field, acquire new skills, or learn the latest technology.

Employers today are demanding more education from their employees than ever before. A certificate in a specialized area represents knowledge, accomplishments, and competencies. What better way is there to position yourself for advancement in your career or to prepare for a new one?
